It is not sufficient to have an effective air and surface surveillance system in place, however, if it is not used. The Coast Guard's Air and Surface Surveillance System (AS3) is a joint effort between the Coast Guard and the Navy to provide a comprehensive, integrated, and coordinated system for the detection, identification, and tracking of surface and subsurface threats. The AS3 system is a joint effort between the Coast Guard and the Navy to provide a comprehensive, integrated, and coordinated system for the detection, identification, and tracking of surface and subsurface threats.
